

**Senior School Bring Your Own Device (BYOD)  
 Device Specifications and Minimum System Requirements**

As an alternative to the Student Laptop Program, students in Years 10 - 12 who have completed a 'Laptop Exemption User Agreement'; can elect to bring their own computing device to school for classroom use. This personal computing device needs to be still under manufacturer's warranty; and meet **Device Specifications** that are recommended by the school and listed below.

The device specifications identify the minimum system requirements/hardware specifications for student devices and offer guidance on some suggested makes and models so that parents are fully informed about requirements

While devices manufactured within the last 12 months may meet the minimum system requirements/hardware specifications, the school strongly recommends that students **choose a durable laptop device** to ensure that their device maximises their learning experiences.
