

Dear Parent/Guardian

**Re: 2025 Student Laptop Program**

Student computers typically have an operational life of three to four years. By Year 10 many students are due for an upgrade to their Laptop Computer. This year the School has again partnered with Atturra, a tier one Hewlett Packard vendor. Atturra have obtained guaranteed delivery of the windows model as outlined below. We will also offer an Apple option which can be ordered through our Apple provider Education Advantage (details below). Both laptop options will come with all the software necessary for the students' educational program. The laptops also come with onsite (school campus) support for both hardware and software, including a loan laptop if required. As part of our continuing investigations into the Student Laptop Program, we researched several other schools' programs and best practices. We found that while Bring Your Own Device (BYOD) does not meet the desired learning outcomes for most students and lacks onsite support, we will accommodate those students who wish to differentiate their choice of device. Further information regarding BYOD can be found on the school website <https://www.stpaulsags.vic.edu.au/enrolment/for-our-families/>

**The benefits of the Student Laptop program include:**

- Access to software with a value of over \$2,000 (Microsoft Windows, Microsoft Office 365, Sophos Antivirus Software, Adobe Creative Cloud, Inspiration and other class required software); and
- Reliable and unimpeded access to the ICT resources needed to participate in the learning program of the school.
